Spend quality time and enjoy the company of your family members by doing activities together.

JAL PARYAVARAN SURAKSHA ABHIYAN

School Summer Vacation Programme

Three-fourth of Earth's surface is covered by water bodies. 97 per cent of this water is present in oceans as salt water and is unfit for human consumption. Fresh water accounts for only about 2.7 per cent. Nearly 70 per cent of this occurs as ice sheets and glaciers in Antarctic region and other inaccessible places. Only one per cent of fresh water is available and fit for human use. So it is very important to conserve this precious resource. And yet we are contaminating the existing water resources with sewage, toxic chemicals and other wastes. Increasing population and rapid urbanisation has led to over-use of water resources leading to water pollution and scarcity.

By practicing simple steps in our daily routine, we can conserve water and ensure the availability of water to future generations. So don't tarry; start saving each and every drop of water.

Let our motto be "Save water, save life, save the world".

Here is an opportunity for you to become water prefects! And this is possible via participating honestly and sincerely in this small module, i.e, '**Jal Paryavaran Suraksha Abhiyan**' during your summer vacation. You can select an activity as per your interest. The options are:

1. **Painting**
2. **Poetry writing – Hindi & English**

The painting or poetry should include tips to save water in your school, at your house and in your neighbourhood.

Also keep a bird feeder in your house to help the thirsty birds quench their thirst in hot summer season. Encourage your friends and others to do the same.
