

Grade:Nursery

Subject-Holiday Fun Session-2017-18

Dear parent,

Multiple Intelligences provides eight different potential pathways to learning and that too in a fun way. Keeping this in mind we have developed holiday fun activities for our Nursery wonders so that each child has the opportunity to enjoy and learn in ways harmonious with their unique minds.

### 1) Word Smart:

My treasure trunk:

Children love to explore, collect and preserve their favourite objects which become treasure for them. Summer fun has just begun and children are happy enjoying their holidays while they go to different places, play with their friends or spend time at home with family. Lets make their playtime fun as well as educative, So kindly help your child collect objects with letters (atleast 2 objects with every letter given to your child mention below). Kindly make a treasure box for your child and put all the objects in it. Decorate the treasure box as creatively as possible. Kindly send this on 3rd July.

Example:

t- teddy (small), toy, triangular object.

l- ladder (small), lock, lion (toy)

p- pen, pencil, paint, pan (small)

These are just few examples. Use your creativity to make their learning fun and educative.

## **2) Music Smart:**

### **Sing Along**

Childhood memories should be full of fun and frolic. Rhymes and songs are an essential part of the growing up years. Sing along with your child and have fun. While you are at it, you could also sing the phonics song along with your child (for reference you could use [jollyphonics.com](http://jollyphonics.com)). This will help strengthen the phonic sounds of letters of the English Alphabet. (In case you require any help regarding the phonic sounds, you can get in touch with the teacher and clarify your concerns). While your child sings jolly phonics kindly record a video and email it to the **Center Incharge** in the first week of **July**.

## **3) Logic Smart:**

### **Kitchen Games:**

Keep your child busy while you work in the kitchen by playing games, such as guessing games, sensory games, colour games, games with shapes, etc.

- Have her/him close the eyes and guess what you are cooking by the fragrance of the food being cooked.
- You could even hand over an ingredient - like cinnamon, cardamom, orange, etc. and ask to smell and guess what it is.
- You could also ask them to close the eyes and guess what you are doing by listening to the sounds in the kitchen.
- Hand the child certain objects (while the eyes are closed) and ask the child to feel and guess what the object is (for instance a wiggly jelly, a squishy sponge, smooth rubber glove, rough kitchen towel, etc.).
- Sort out the kitchen cabinets with your child. Encourage him/her to place all the big container/plates/spoons on one side and the small ones on the other side (you could also sort and pair objects together).

## **4) People Smart:**

### **Cultivate manners**

Remember Magic words and make use of these words in your daily routine to enhance your personality.

### 5) Self Smart:

Being independent is a trait which should be infused in the child right from the beginning of Early Years .Summer holidays is the perfect time to teach and train our little wonders to be self smart.Kindly help your child in the following:

- 1.Encourage your child to eat independently.Let the child create a little mess but do not discourage her/ him while she is trying to learn to self help herself.
- 2.Let the child take bath herself/himself under your guidance and vigilance.
- 3.Let the child wear clothes on her/his own .
- 4.Make your child wind up his/her toys after using them and put them at proper place.

**6) Body Smart:** Outdoor activities make children healthy and strong. Children love the outdoor even more when parents become a part of it. Take your child to the park, swimming, cycling, skating and let them enjoy the nature around. Involve them in yoga, breathing exercises, morning walk and can play some ball games with them to make them feel active and enthusiastic throughout the day.

**7) Nature Smart:** When we take care of nature/environment, nature takes care of us. Teach your child how to water plants daily. Keep a bird feeder and let your child replenish water and bajra every day. Let them feed stray animals within their surroundings.

**Feed the birds with grains and water in the scorching heat.**

**A visit to the zoo or a Bird Sanctuary**

Plan a visit to the zoo or a Bird Sanctuary. Explore features of different animals and birds.

Create 6 flash cards with a picture of any bird or animal you saw. Bring the flash cards to school.

**8) Picture Smart:** Pictures leave a memory forever. Click pictures of your child doing all the above activities. Make an E-folder of the same and mail it to us by 30thJune2017. We will make a scrap photo album for your child and give it to you which will be treasure for the life time.

**Regards,**

Ms Sanyogita Sharma
